

SAP Fiori for Office 365.

Office 365 for SAP

...leverage any Fiori transaction from SharePoint & Outlook

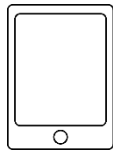

Do you like SAP Fiori?

Do you share content with your
CO-workers?

Are you missing one single place
for all your tasks?

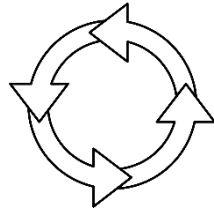

Office 365 for SAP

tightly integrates Fiori transactions into SharePoint, providing tasks, workflows and powerful email actions from Office365, with secure, online effect in the SAP backend.

Office 365 for SAP

Task Dashboards: integrate all your SAP and non-SAP tasks in one single SharePoint Site

Access the same data from the Fiori apps when you are on-the-go

Work from Outlook: visualize and take decisions from the email body itself

Office 365 for SAP

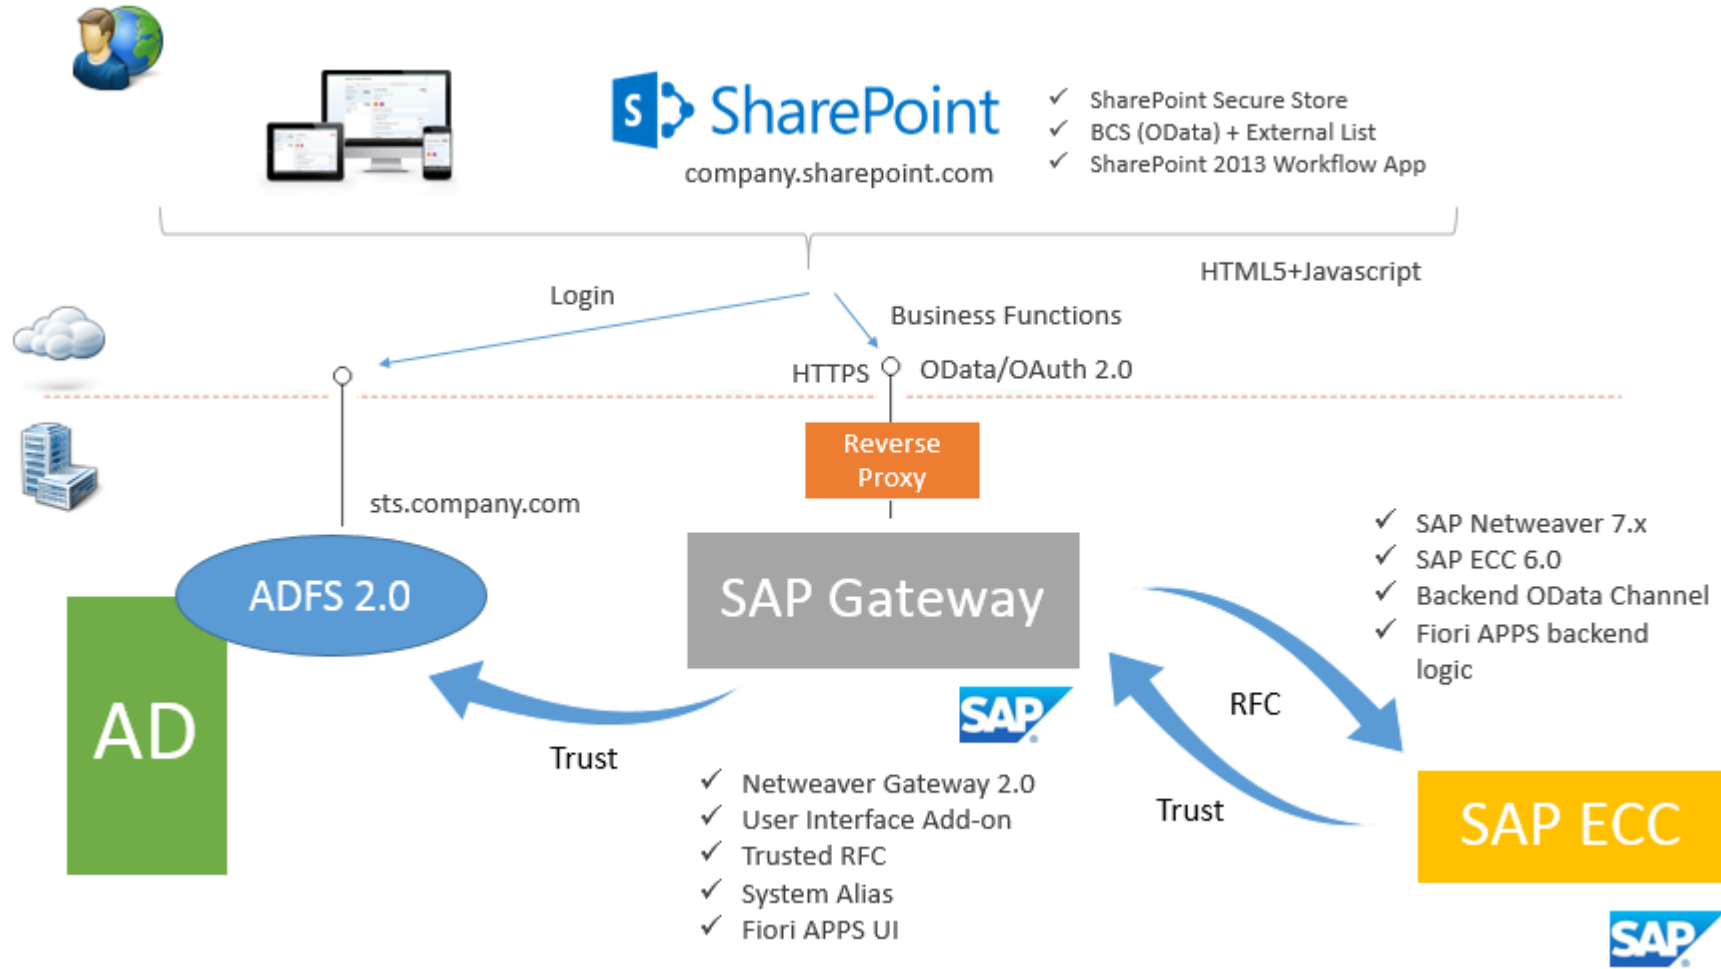

Features

- ✓ Access SAP critical info securely from the Office365 Cloud
- ✓ Visualize and work with any SAP task, directly from SharePoint
- ✓ Build personalized, unified task dashboards for users
- ✓ Receive rich-text email notifications with direct powerful actions
- ✓ Share SAP documents and tasks with co-workers on the SharePoint Intranet
- ✓ Work seamlessly across pure SharePoint workflows and SAP-backend workflows

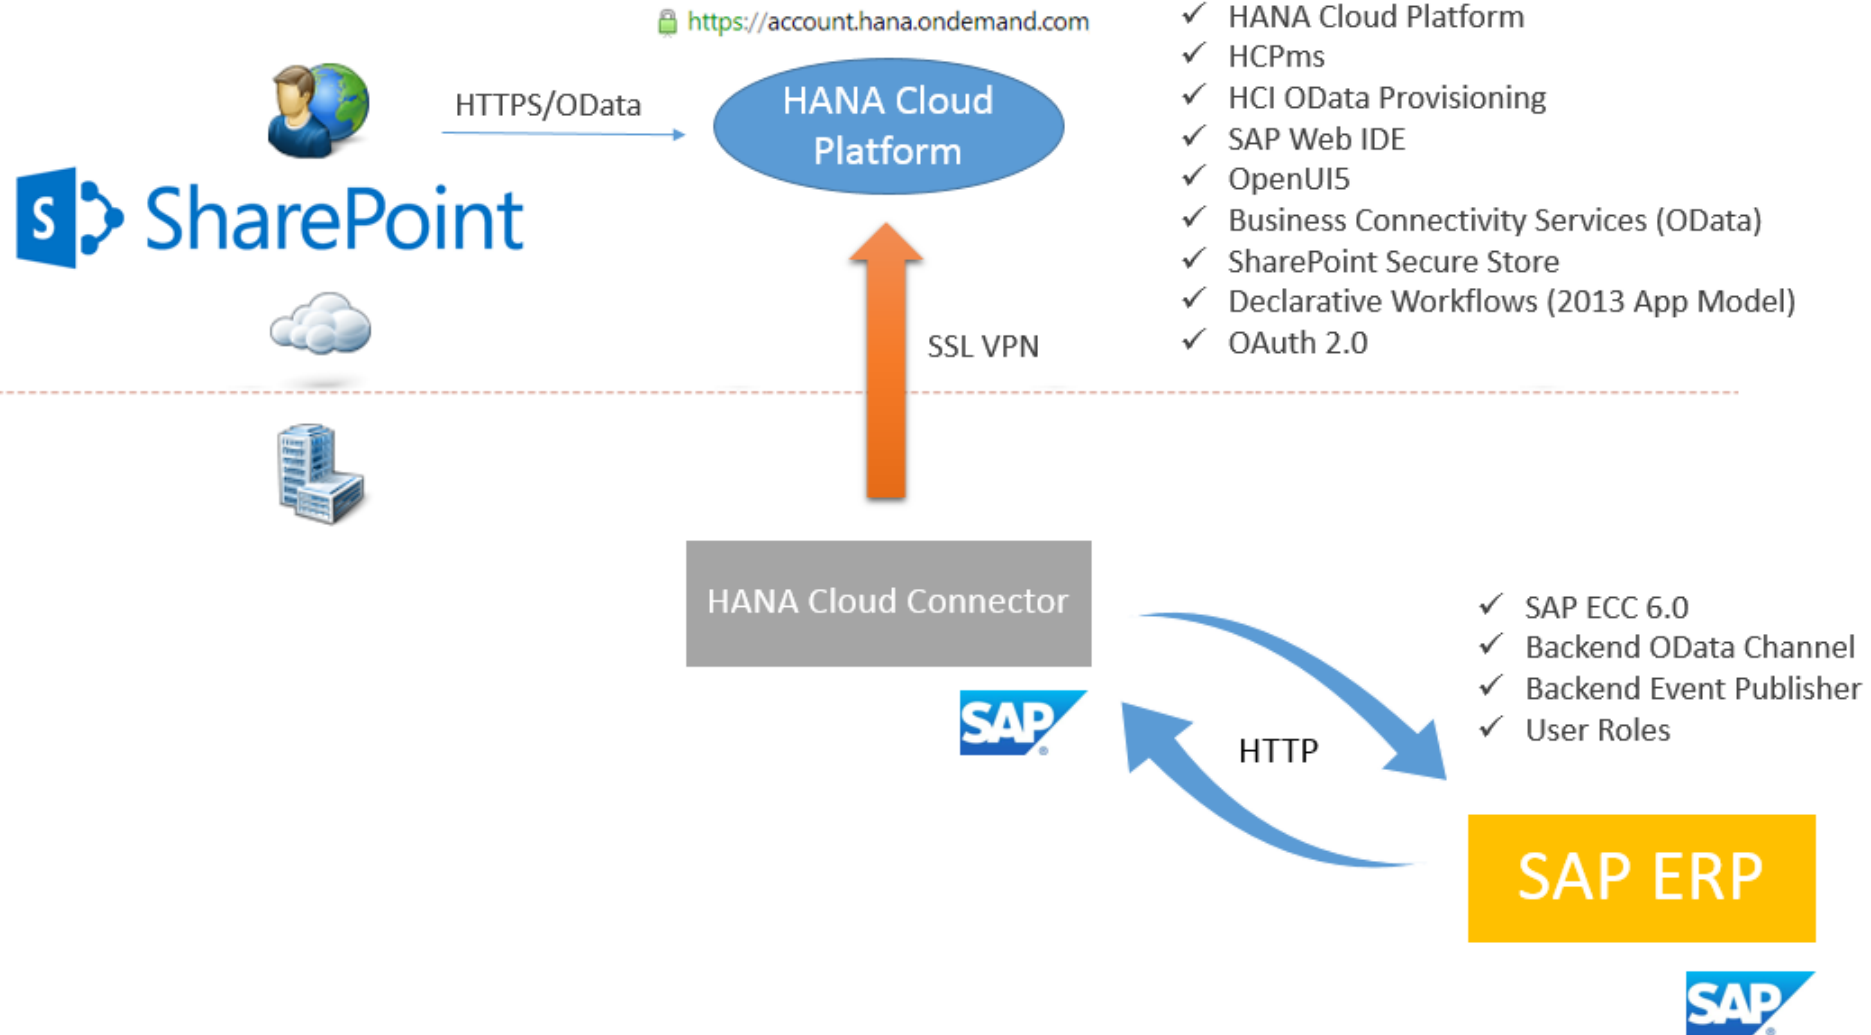

Benefits

- ✓ No Azure subscription or any additional license is required
- ✓ Authentication and Single-Sign-On carried out securely via OAuth 2.0
- ✓ Cloud Security: SAP data resides only on SAP and never on the cloud
- ✓ Ready-to-use features to boost productivity
- ✓ Simple, lightweight setup
