

## SAP User Experience

... the new way to use and build business applications

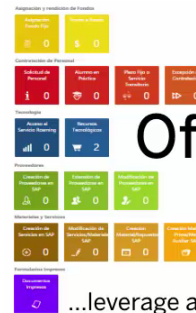

# Apps on the SAP Store

## BlueBoot Apps for SAP PM

Provided By [BlueBoot Business Software](#)

This product provides users a mobile solution to perform the complete PM cycle in a responsive, simple and user-oriented way. Being as powerful as SAP transactions, it allows users to create PM notifications, approve PM notifications, create maintenance orders...

## Office 365 for SAP

...leverage any Fiori transaction from SharePoint & Outlook

---

# User Experience Field

Questions we answer

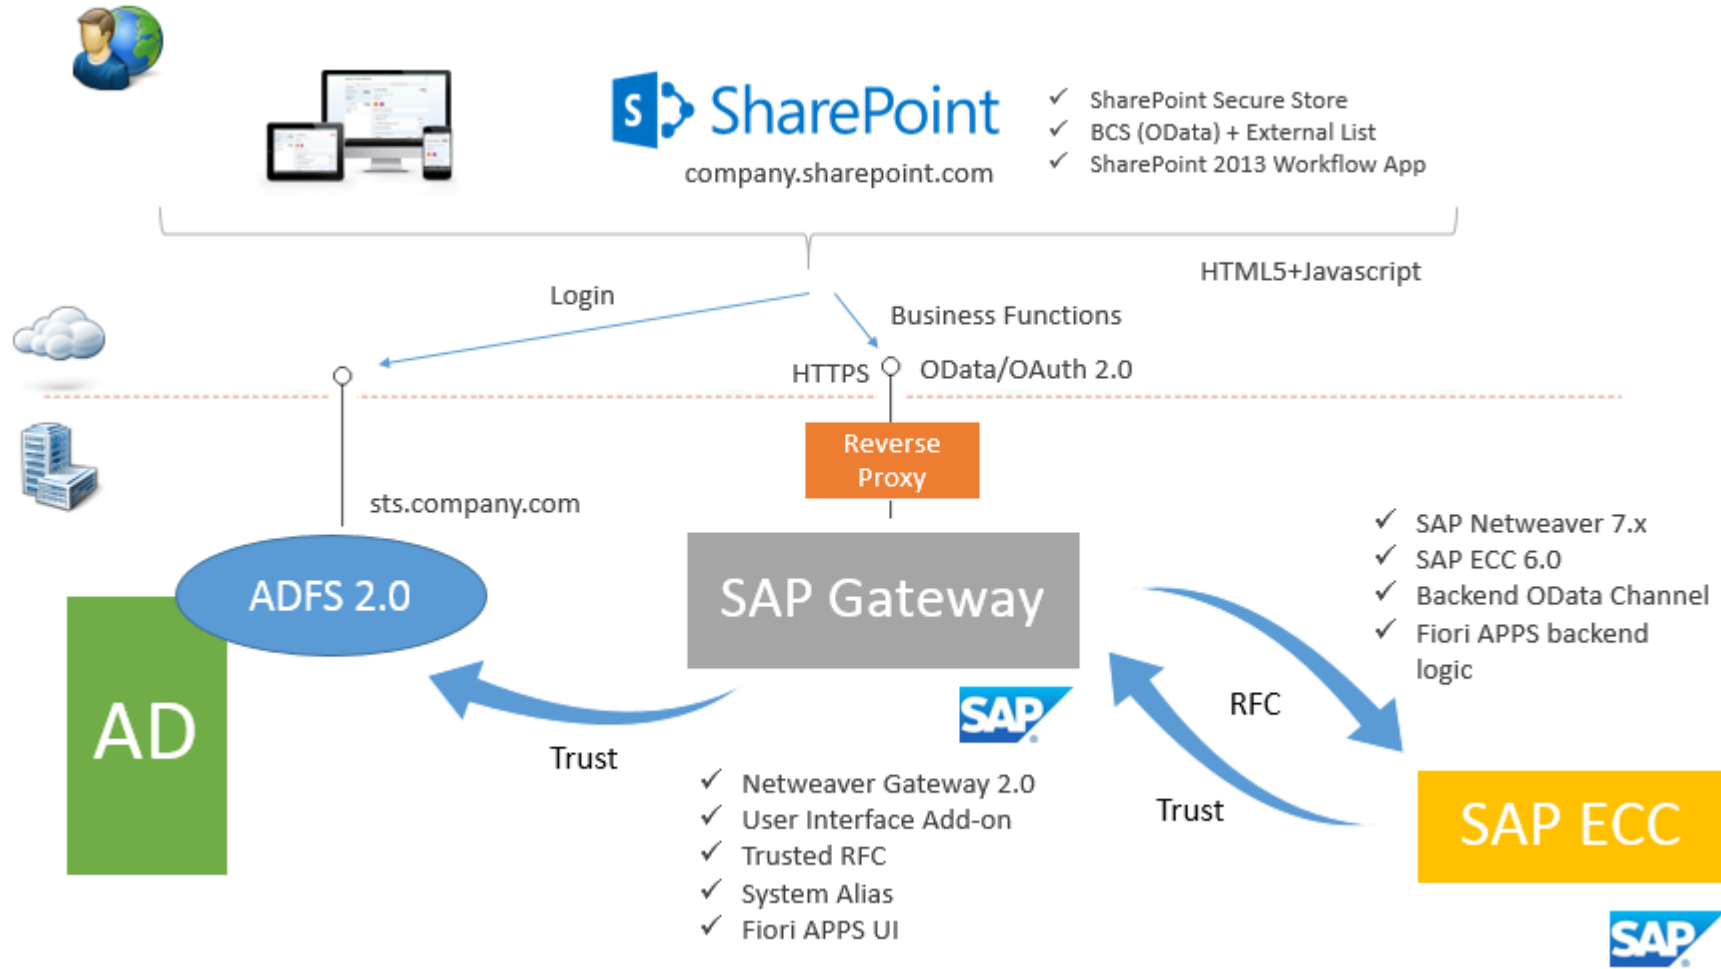

- What does it take to have Fiori and/or Screen Personas?
- What does it take to build a new business app with SAP platforms?
- How does an application work offline?
- What is the authentication & single-sign-on strategy we should choose?
- What happens when someone loses a mobile device?
- Do we need on-premise infrastructure?
- What about external users and B2B/B2C applications and licenses?
- What role do design-thinking and agile methodologies play?
- What is the SAP roadmap regarding user interface?
- Which one of my systems is better to work with workflows and SAP?
